

STATXO

Powering Smarter Decisions

Are Inconsistent Data & Redundant Records Overloading Your Procurement & Supply Chain Systems?

Unlock **Faster** Sourcing, **Cleaner** Data & **Smarter** Decisions

With **STATXO's** Master Data Management (*MDM*) Solutions

Is Hidden Data Chaos Quietly Undermining Your Procurement & Supply Chain Performance?

| Unanticipated Challenges That Can Impact Your Business

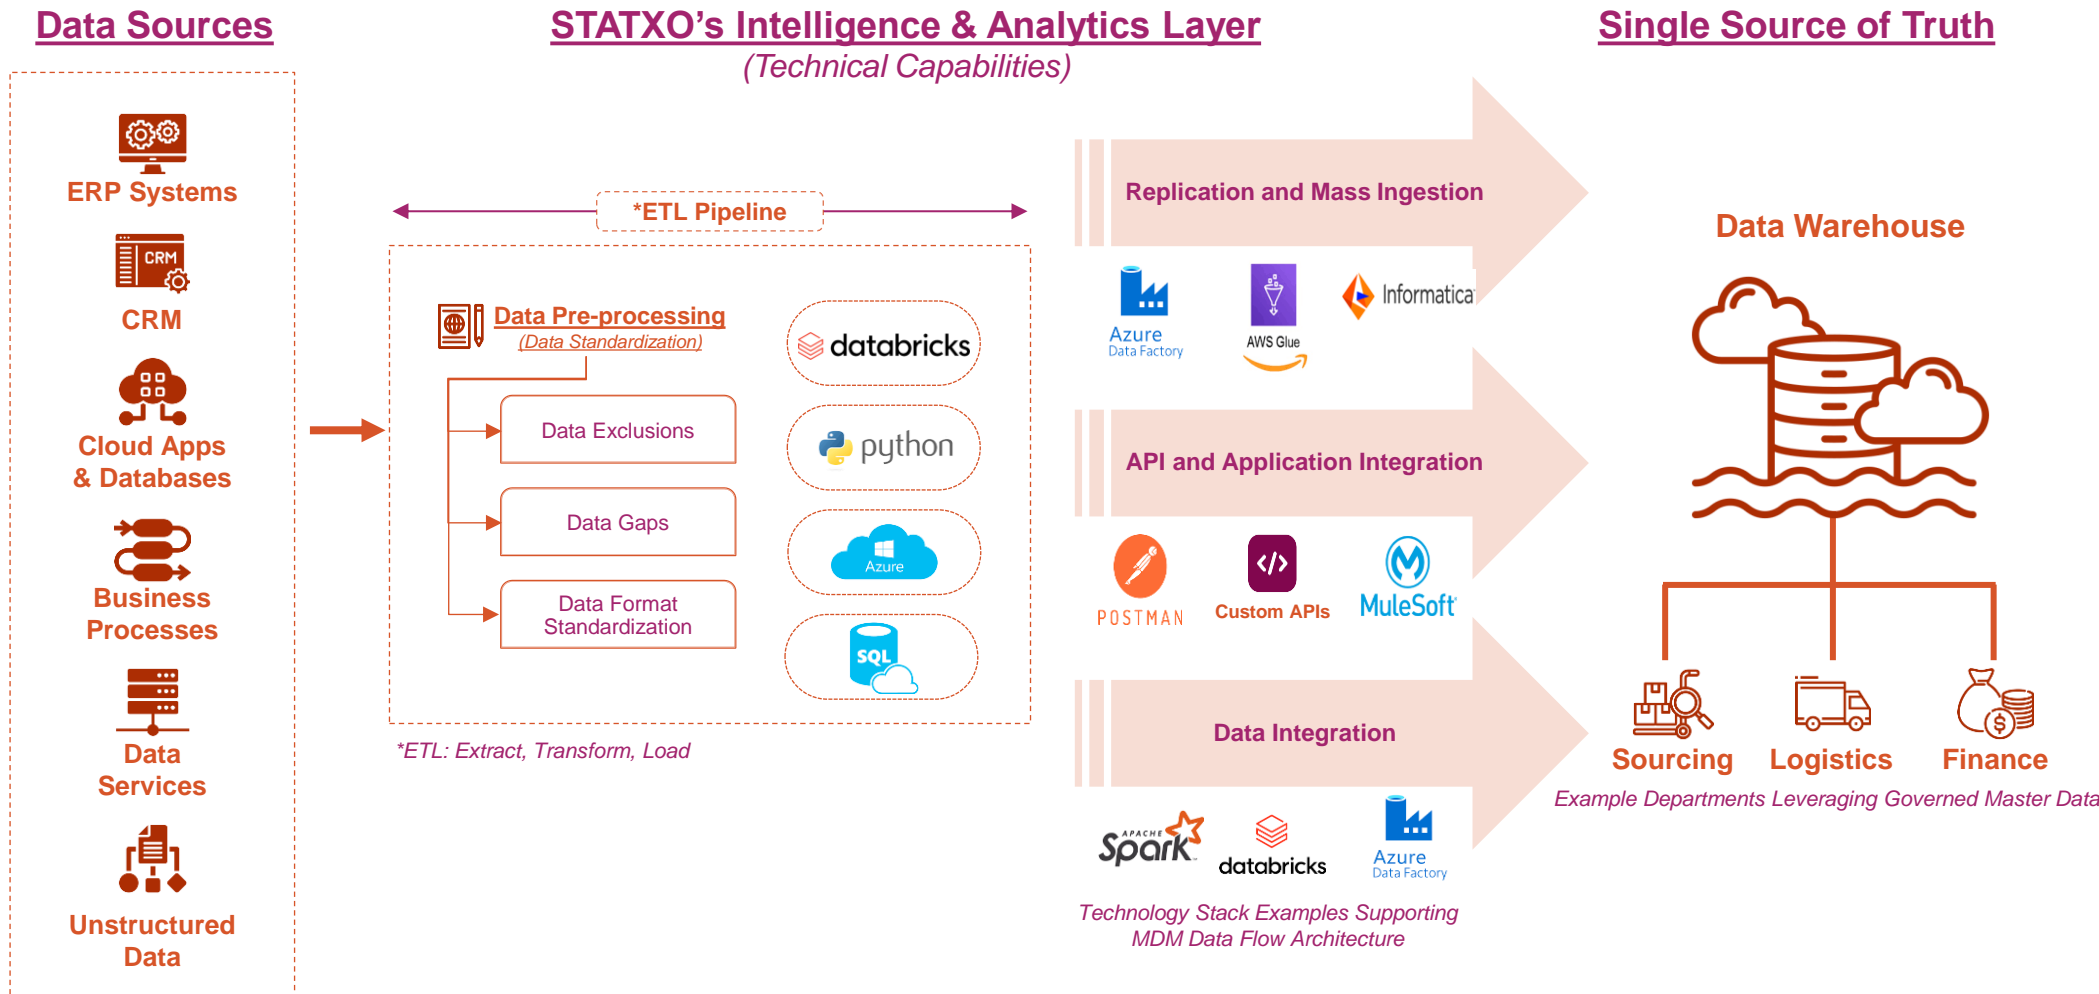

These challenges lead to poor decision-making, operational inefficiencies, and lost business opportunities across the Enterprise.

Faster. Cleaner. Smarter –

Turn Data Chaos into Clarity With STATXO's AI/Gen AI-Driven MDM Solutions!

Achieve High-impact MDM results through this Architecture and the following Strategic Enablers:

- Strategic Advisory services for end-to-end MDM Transformation
- Seamless MDM Adoption through Change Management & Process Re-Engineering
- Sustainable Value Creation with Proven Frameworks & Industry Best Practices

From Fragmented to Focused Data: Empower Your Strategic Sourcing with a Single Source of Truth!

STATXO's Master Data Management (MDM): Key Differentiators

- ✓ **Agentic AI** (*Autonomous Data Cleansing, Real-Time Master Record Creation, Proactive Data Governance*)
- ✓ **Decision Intelligence** (*Data Categorization, Data Governance Insights, Targeted Data Remediation*)

Benefits to the Client

~**40%** reduction in data management costs via serverless (*cloud-based, APIs, etc.*) data integration

Up to **95% improvement** in data quality via automated data cleansing, deduplication, & validation

AI-Driven Master Data Management (MDM) for Smarter Procurement Decisions!

Client:

A Global **Industrial Automation** Company, with **annual spend** of ~\$2.2Bn, and a diverse portfolio **featuring over 100 brands**.

Challenges:

- Siloed Data across Disparate ERP Systems
- Unstructured Data due to Inconsistent Formatting
- Non-Standardized Format for Item Nomenclature

Benefits:

- ✓ Up to **95% improvement in data quality** via automated data cleansing & enrichment workflows
- ✓ **~25% improvement in operational efficiency** through standardized item formats, enabling consistent data and system integration

Client:

A Leading **US-based Luxury Retailer** with **geographic presence** in more than **20 countries**, **~500 stores**, and an annual spend of **~500Mn**

Challenges:

- Absence of a centralized Data Warehouse causing data silos
- Lack of Standardized Data Governance Policies

Benefits:

- ✓ **~20% improvement** in data accuracy rates through a unified data management system
- ✓ **Reduced procurement costs** by implementing a robust data governance framework, **driving savings** through compliance & improved **data consistency**

STATXO: Powering Smarter Decisions

Who We Are: A Global Leader in AI-powered Procurement & Supply Chain Transformation solutions, specializing in End-to-End Procurement & Supply Chain Intelligence and Analytics, empowering businesses from mid-sized to Fortune 1000 companies.

Industries: Industrial Goods & Manufacturing | Automotive | Consumer Goods | Chemicals | Technology | Industrial Automation | Logistics and many more

Expertise: Data Science | ML & Deep Learning | Gen AI | Agentic AI | AI Orchestration | Domain Knowledge | Strategic Research
